

The Brain is a Mirror (flip horizontal, then flip vertical) reflection of the human body parts...GroveOrgan-Ics: Hi...This is GroveCanada's c

Hi...This is GroveCanada's current  
research into Art in Medicine,  
looking at "ick" the "organs"  
which led to the name  
"GroveOrgan-ICS"...

Sunday

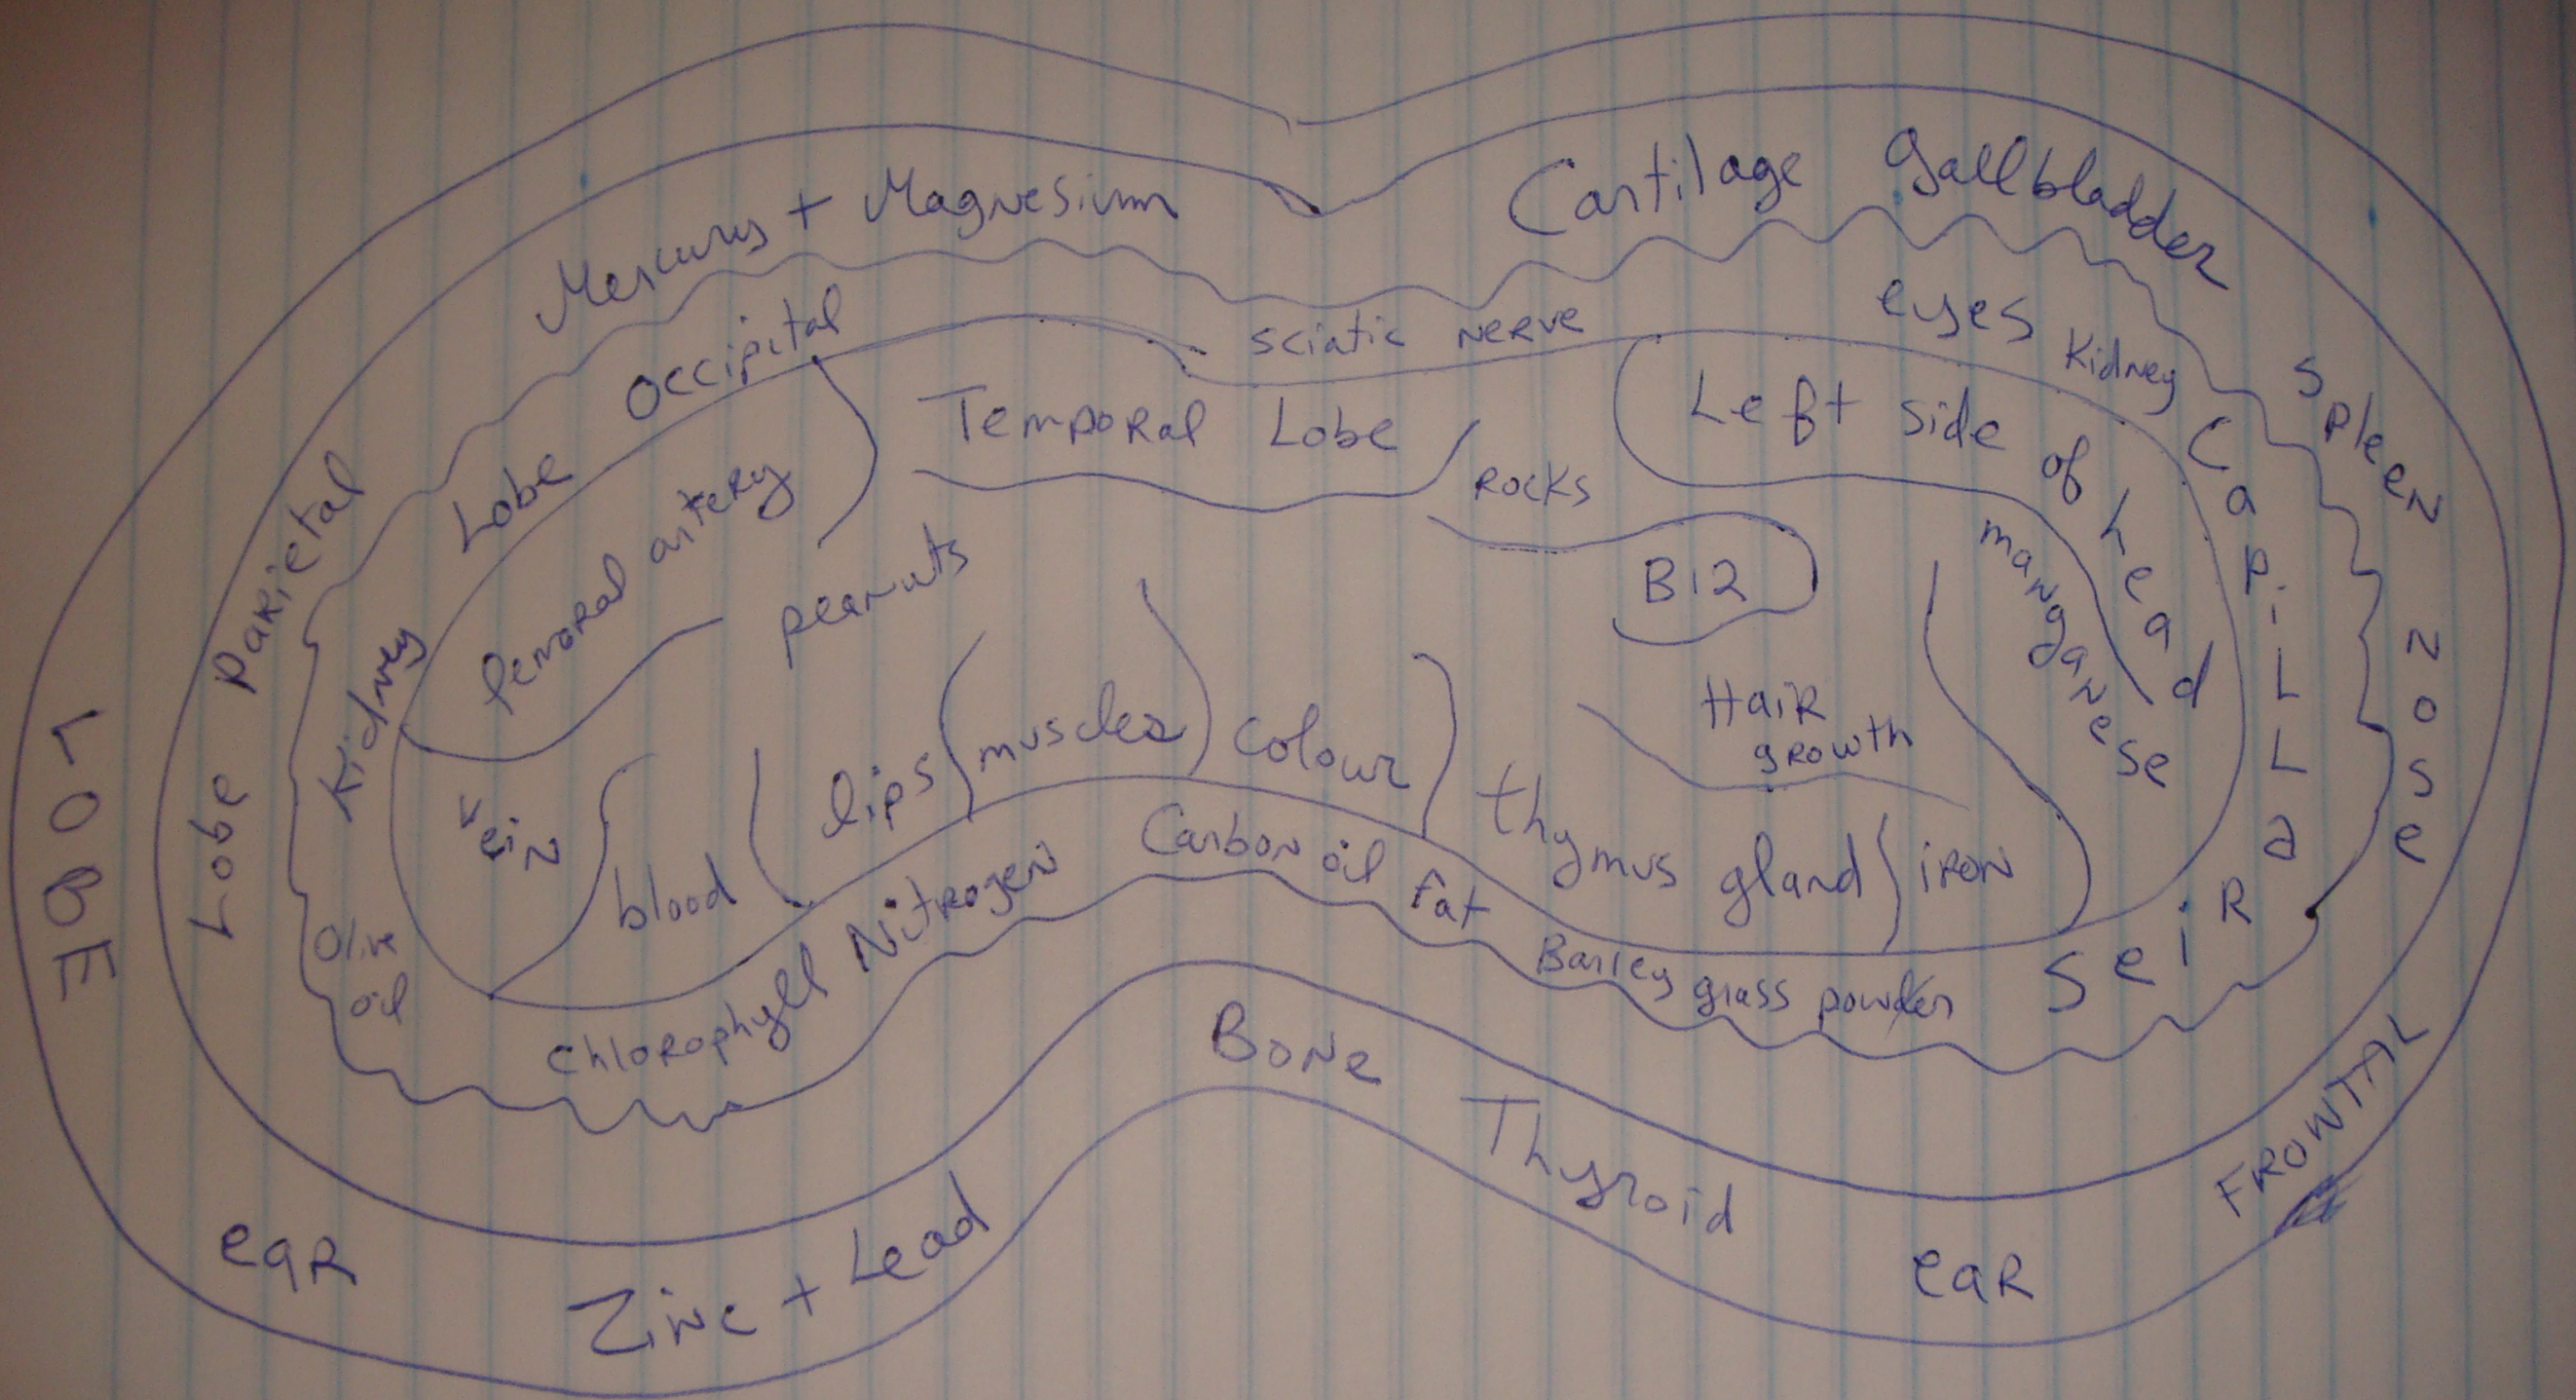

## THE HEAD

Ferrous Gluconate is iron

Thymus also contains Manganese like in

Peanuts or Pumpkin Seeds

(warning strong lowering of blood  
pressure effect)

BLOOD CELLS

Titration:

Grapefruit plant contains Iodine

Iodine kelp is Iodine

add water hot is anti-skincancer

(calcium is the antidote  
if you take too much  
chemo iodine)

Adrenal Gland

HairGel

Madagascar periwinkle is Iodine

Vinpocetine is Iodine too

**barley Grass Power** • Is Nitrogen  
Green

fixes nerve damage in nose

Milk contains carbon which cleans out your kidneys

Carbon is like Oil  
Yellow

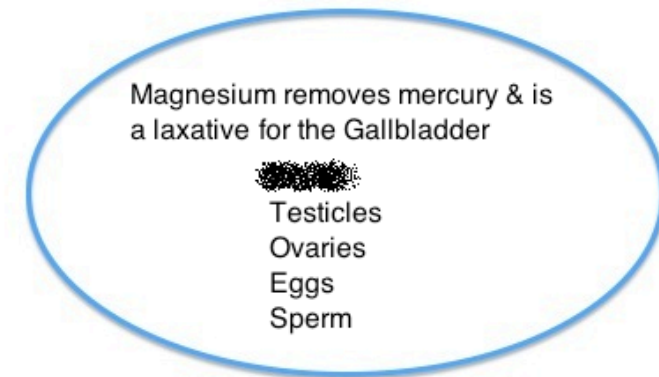

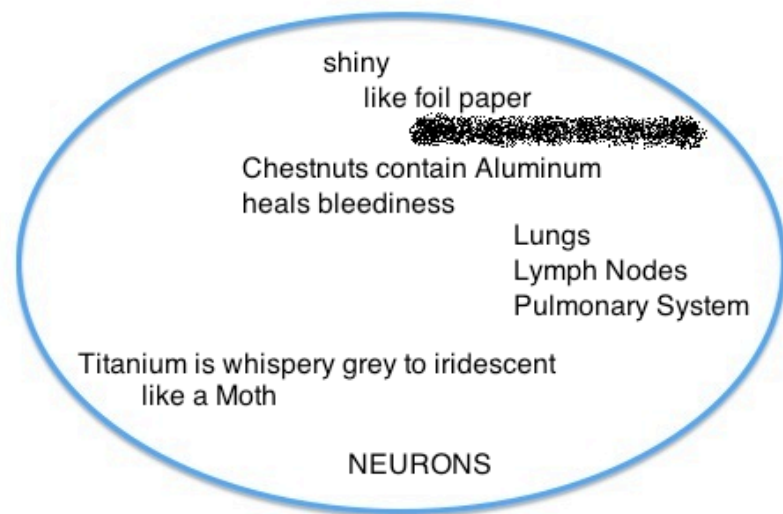

CAPILLARIES & NERVES

(CORDS)

(LINES)

TUBES

The brain is  
a vertical Flip  
plus a horizontal flip of the human body  
organs  
(draw a map then use your computer  
edit tools)

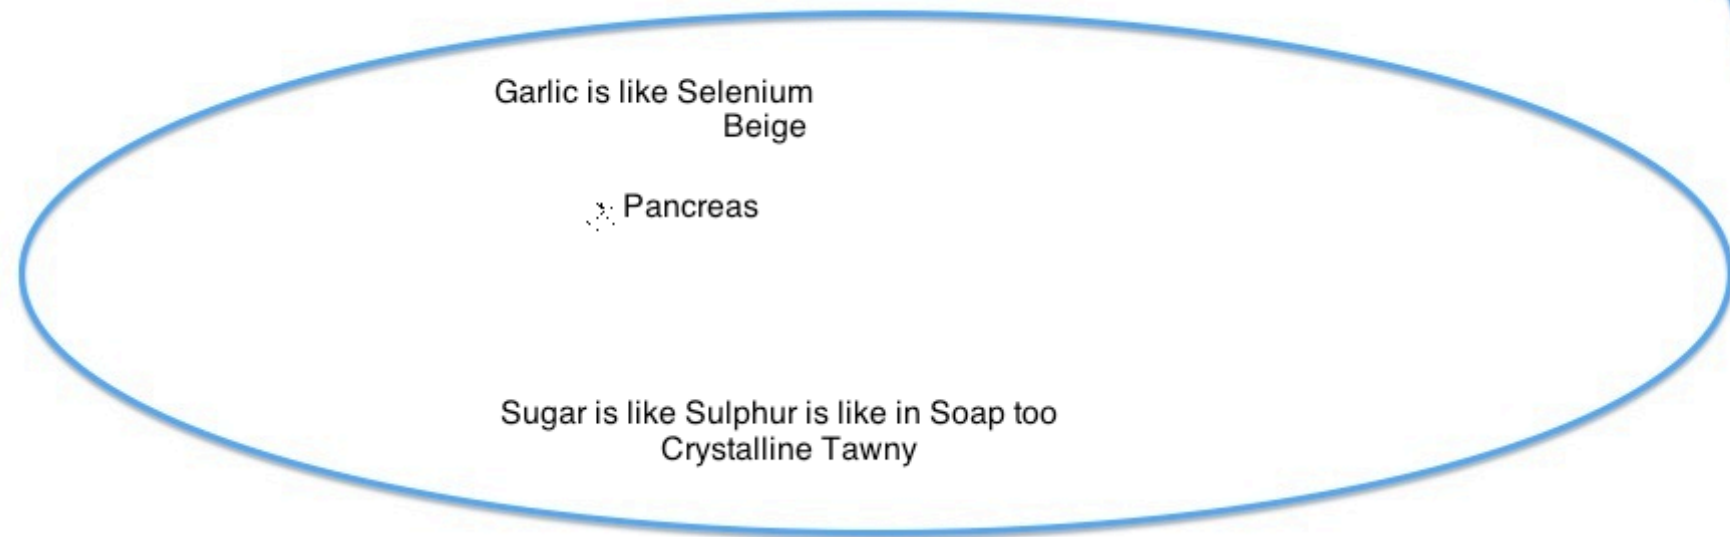

Spleen  
Copper chelated is a supplement available at Noah's Natural Foods  
Orange

The Spleen also likes phosphorus  
Blue  
which  
is found in blue cheese, turquoise  
jewellery, blue mold, pigeon poo & often  
people or animals who have been hit  
by cars, or trains, or airplanes...

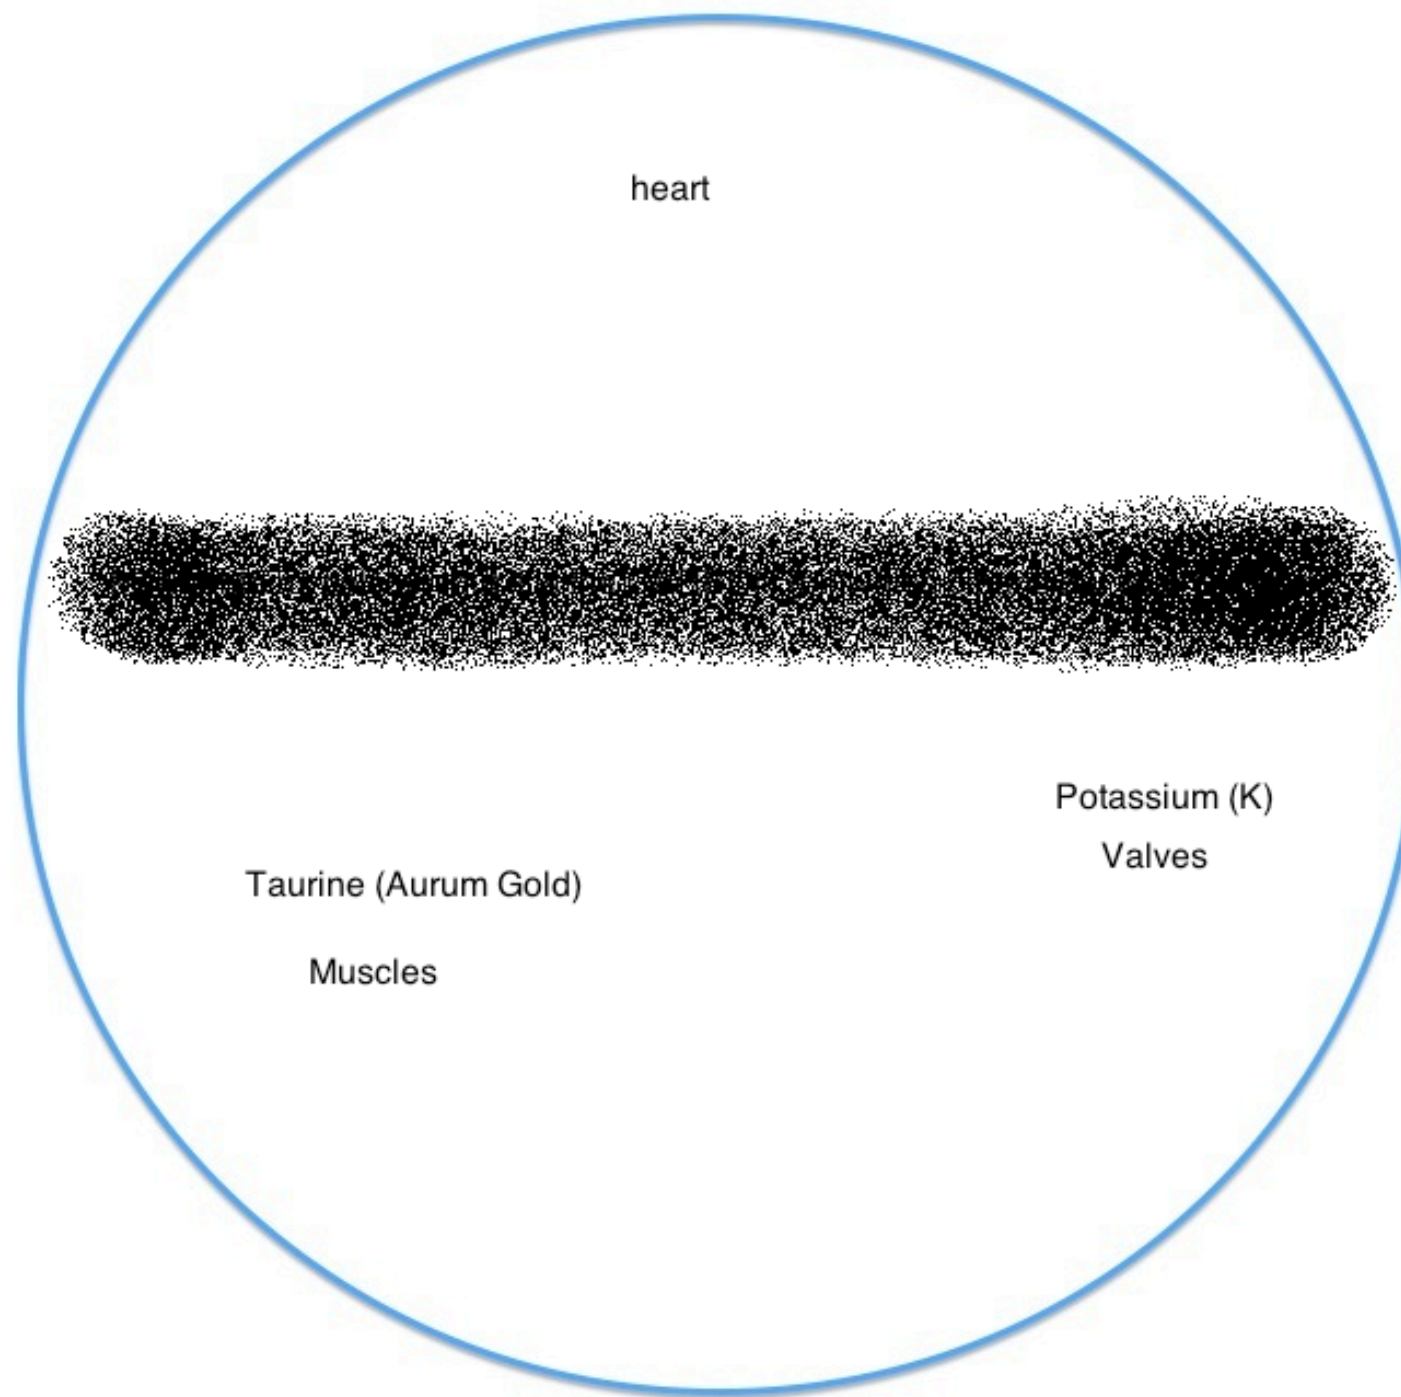

BOWELS COLON INTESTINES

dark grey to black  
BISMUTH CHARCOAL  
OR  
FLUORIDE FLUORINE (makes people more domestic, but cleans out plaque)  
whitish to clear

A slide by slide recording (is available on the GroveCanada Youtube Channel) by Sari Grove telling of the two elements that live in each body part, in balance let's hope, & how you can maybe try to understand that idea in a sort of simplified version of how the body works without worrying too much about hard stuff...p.s. the Liver needs Hydrogen (like water or alcohol) & Oxygen, (you can eat Oxygen by eating Goji berries or Dandelion greens or even V8 Tomato Juice type drinks (tomatoes contain lots of Oxygen), by the way)...

If you have a foreign object stuck in your head, establish its parameters...  
Is it a 1,2,3,or 4 in terms of how deep it is?

- 1) The outside of your head- Bones:
- 2) Deeper in your head- Cartilage:
- 3) Very deep in your head- Capillaries:
- 4) Right in the middle of your head- Neurons:

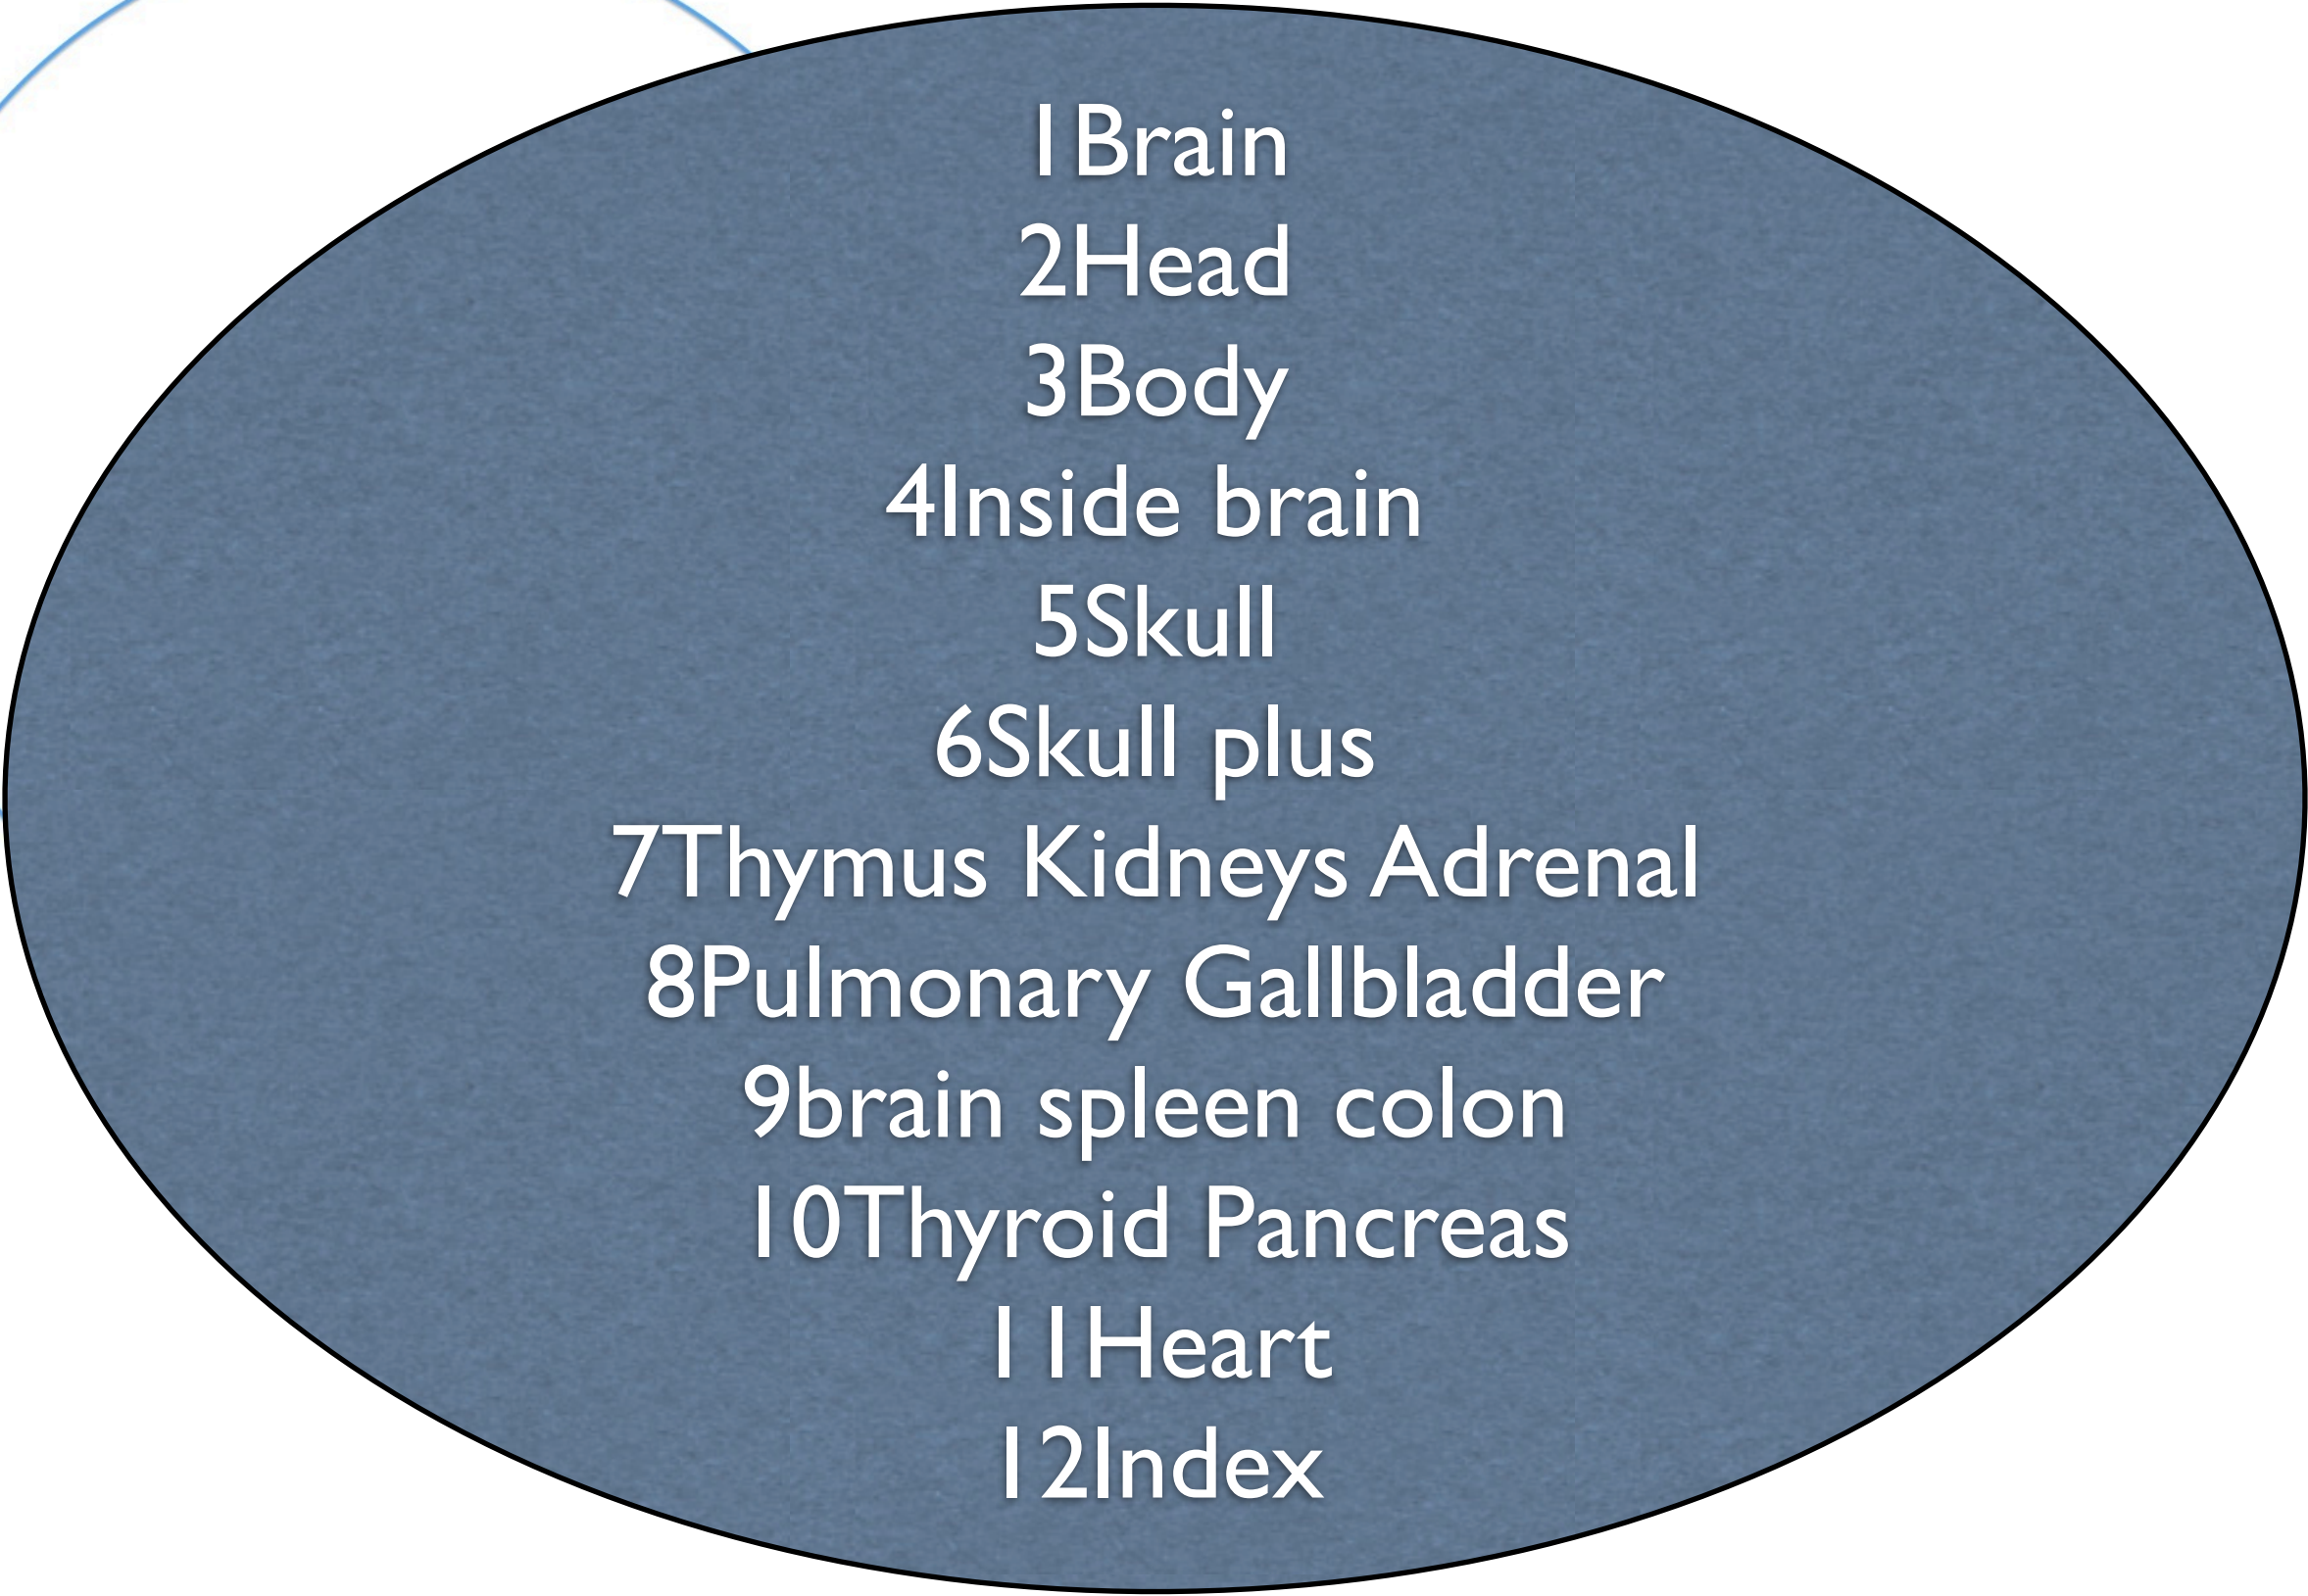

If it is a 1) then Zinc things remove it,  
Lead things embed it further...

If it is a 2) then Magnesium things remove it,  
Mercury things embed it further...

If it is a 3) then Carbon things remove it,  
Nitrogen things embed it further...

If it is a 4) then Phosphorus things remove it,  
Copper things embed it further...

Once the foreign object is out, then you can heal the wound by using the things that embed it further to actually heal the wound... But only AFTER the foreign object is gone...
